THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Graciela Cowger on July, 16th, 2010.

The application has been amended as follows:

Claim 13:A method comprising:

generating, using a plurality of encoders, a plurality of separately transrated output bitstreams from a compressed input bitstream including at least one input video segment; and

incorporating the plurality of output bitstreams into a video block for the compressed input bitstream comprising a header, an input video segment, a plurality of output video segments corresponding to the plurality of output bitstreams, and offset information for each ones of the plurality of output video segments, the offset information configured to indicate a start of a corresponding output video segment responsive to ones of the plurality of output video segments packaged end-to-end within the video block, and separately encoding individual ones of the output video segments at a different bit rate while including a same portion of programming content from the compressed input bitstream;

wherein the offset information allows for selection of at least one output video segment from the plurality of output video segments responsive to bitrate demands of other concurrent output streams from at least one other compressed input bitstream without real-time transrating of any of the plurality of the output bitstreams.

Claim 38: A system comprising:

a plurality of encoders configured to generate a plurality of separately transrated output bitstreams from a compressed input bitstream including an input video segment; and

a formatter module configured to incorporate the plurality of output bitstreams into a video block for the compressed input bitstream comprising a header, the input video segment, and a plurality of video segments corresponding to the plurality of output bitstreams, the formatter module configured to separately encode individual ones of the video segments at a different bit rate while including a same portion of programming content from the compressed input bitstream;

wherein the header is configured to identify an offset for ones of the video segments indicating a start of ones of the video segments responsive to the video segments are arranged end to end in the video block;

wherein ~~the~~ a switch module is configured to seek the start of the selected one of the video segments responsive to extracting the offset associated with the selected one of the video segments from the header; and

wherein the video block is configured to allow a the switch module to select from the video block for the compressed input bitstream one of the video segments for output

Art Unit: 2621

responsive to bit rate demands of other concurrent output streams from at least one other compressed input bitstream without decoding of any of the plurality of the output bitstreams.

Allowable Subject Matter

Claims 13-15, 17, 18, 20, 21, 28-40, 42-44, 50, 51, 53-55, 57-65 and 67-72, allowed.

The following is an examiner's statement of reasons for allowance:

Independent claims, 13 and 38 require transcoding an input bitstream into several output bitstreams representing the same contents at different bitrates using a plurality of encoders, then incorporating the bitstreams into a video block which includes the input bitstream, and each of the output bitstreams. The video block also including a header with offset information for the video segments in the block. At a later time one of the bitstreams is selected from the video block for output.

The closest art is the applicant's admitted prior art, in view of Hsu and in further view of Birru, Abiko, Zetts, and Ozkan which discloses transcoding an input video segment into a plurality of output video segments and also discloses incorporating two video segments representing the same contents into a common bitstream. However, the prior art fails to disclose incorporating a plurality of video bitstreams into a video block including, an input video segment, and a plurality of output video segments encoded at different bitrates as required by independent claims 13 and 38.

The remaining claims depend from independent claims 13 or 38.

Art Unit: 2621

.Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
